ABOUT ME

A deaf developer who communicates exclusively through text, resulting in precise, focused, and highly responsive written communication. This is a natural strength for remote work, where clear text-based communication is essential. Fully equipped to collaborate through chat, email, and project management tools.

PROFESSIONAL SUMMARY

Self-taught Full Stack Web Developer specializing in Laravel and PHP, with hands-on experience building RESTful APIs, MVC-based web applications, and dynamic frontend interfaces. Proficient in MySQL, Ajax, and Bootstrap. Actively freelancing on Freelancer.com, Upwork, and Fiverr.

TECHNICAL SKILLS
